Repair Request

If you have a windchime that was manufactured by Wind River that needs repair, please completely fill out the form below and send it in with your chime for both warranted and non-warranted items. Please note that for warranted items we do ask for a copy of your sales receipt. If you do not have the sales receipt please put an estimated age in the "Date of Purchase" blank and we will evaluate your chime on an individual basis to assess its warranty status.

Occasionally, but rarely, at our discretion, we may choose to replace a chime rather than repair it. We do understand that some chimes have sentimental value, so please remember to mark the section as to whether or not a replacement would be acceptable to you. We do not want to accidentally discard a very important chime.

Please note that we do not repair windchimes that we did not manufacture. If you are unsure as to whether or not we are the manufacturer of your windchime, you may send in pictures to our main email address (service@windriverchimes.com) and we will try and help identify your windchime. Please contact customer service at (888) 978-0001 if you have specific questions about cost, timeliness, etc., and any one of our representatives would be more than happy to help you!

Wind River's Warranty Program:

Each of our chimes has enclosed in the box a warranty card with information about the warranty. The warranty covers all parts in regards to errors in workmanship and materials, such as a sharp spot on a tube that causes a string to wear through. Currently, this warranty information applies to the following brands:

5 Years:

Arabesque
Corinthian Bells
Gentle Spirits*
Bells of Vienna*
Kromatix**

*Brand Discontinued 12/31/2020

**Brand Discontinued 12/31/2017

3 Years:

Shenandoah Melodies
For the Girls

2 Years:

Arias
Festival
In Loving Memory
Lakeshore Melodies*

What Is Not Covered?

The warranty does *not* cover normal wear and tear or loss of parts or any alterations from the original product. Aesthetic damage to the tubes or wind sail from repeatedly banging together or hitting another object does not affect the sound of the chime and is not covered by the warranty. This is normal wear and tear over either a very long time or excessive repeated contact with some object. Under normal use, the tubes of the chime should not hit together. Chimes should be hung where they do not make contact with anything and should be taken down during extreme weather events.

Non-warranty Restringing Program:

If your Wind River chime is not covered under our warranty program we may still be able to repair it for you. For non-warranty repairs, the customary repair fee is \$25 + sales tax and return shipping. Additional charges will apply if replacement parts are required, whether it is by choice for aesthetics or necessity because of loss or damage. Prices for replacement parts vary by size and line. Upon receipt, we will evaluate your chime and call with a quote for your repairs and shipping. Please do not send payment in advance.
